

Final Project Report Group 10

Group members : 109306043黃筠茜, 109306044楊鵬慈, 109306083黃慧如,
109306087花巧臻, 109306088黃任謙

- Introduction

- Topic

Enter a keyword about "薇閣" in the search engine to get information and news about "Taipei Wego Private Senior High School."

- Advantages

Through our search engine, Wego students and parents can easily search for relevant information about "Taipei Wego Private Senior High School." It not only saves lots of time searching and filtering information for students and parents, but also reduces the chance of them ignoring important information.

- ☐ Solve the problem of wasting time finding unimportant data
- ☐ Scheduled information for presenting related results in order
- ☐ Target audience: Students / Parents / School

- The interface of the search engine

- Motivation

Among our group members, one of them is a graduate of Taipei Wego Private Senior High School, and as a Wego student, one of the most frequently asked questions is “Is Wego Boutique Hotel (薇閣精品旅館) related to your school?” or “Is Wego Postpartum Care Center (薇閣產後護理之家) from your school?” However, in fact, it is totally irrelevant. In addition, whenever we search “薇閣” on the Internet to inquire about school-related information, there are often completely irrelevant information, such as Wego Boutique Hotel, Wego Clothing Store (薇閣服飾店), Wego Clinic (薇閣診所), etc., resulting in filtering the search results many times. Due to the above reasons, we deeply feel the inconvenience of Google's search system, so we hope that by setting up this search engine, we can filter “薇閣” things other than “Taipei Wego Private Senior High School.”

- Keywords

Wego、薇閣、薇閣高中、貴族學校、薇閣中學、升學、學測、指考、榜單、國際班、直升、高中、台北、田園教學、私校、大教室課程、國中、小學、幼稚園、房、旅館、臉書、精品旅館、校車

- System design

- User

Users who want to search for information about “Taipei Wego Private Senior High School.”

- Function

Sum up the total weight of each candidate data, and sort them out in order from large to small.

- Goal

We hope to set up an accurate search engine to make it more convenient for users who want to find information about “Taipei Wego Private Senior

High School.”

- Connection between Front-end and Back-end

Front-end:

Search - the first interface in the beginning

GoogleItem - the second interface after searching

Back-end:

GoogleQuery - catch url from google and arrange them in order

TestProject - Main for execute

WebCounter - count weight

WebPage - define elements

Keyword - define keywords

Use query() in GoogleQuery to connect GoogleItem

- Search tricks

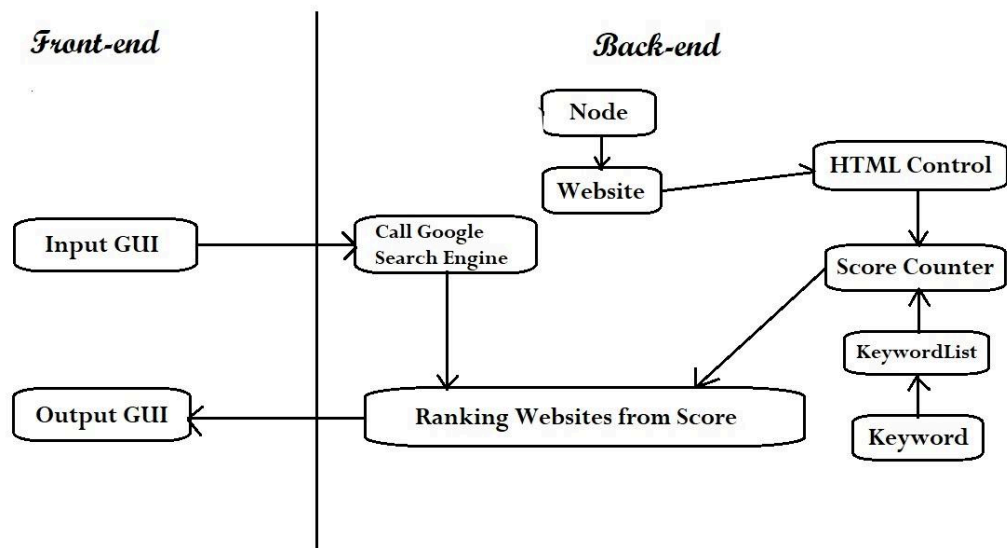

Keywords	Weight
Wego	1
薇閣中學	5
薇閣	3
貴族學校	2
田園教學	4
大教室課程	2
升學	1
學測	1

指考	1
榜單	2
直升	2
高中	1
台北	2
國中	1
私校	1
國際班	2.5
旅館	-5
小學	1
幼稚園	1
臉書	-5
精品旅館	-10
校車	4
房	-5
薇閣高中	5

{Formulation}

$$\text{Score} = \sum_{i=1}^{n=19} (\text{Keyword} * \text{Weight})$$

- System Diagram

- Schedule (adjusted)

	Plan	Design	Write Program	Test Program	Presentation
11/07-11/13	Proposal				
11/14-11/20	Adjust proposal	Collect websites			
11/21-11/27		Count keywords & score			
11/28-12/04		GUI design			
12/05-12/11		System design	GUI code		
12/12-12/18		System design	System code		
12/19-12/25			System code		
12/26-01/01				Debug code	Prepare PPT

01/02-01/08					Prepare project demo
01/09-01/13					Project demo Final Project upload

- Answering Challenges

Before implementation, we believe that there will be the following challenges:

Q1. How to filter the results of searching “薇閣” on google, and only keep the relevant information of Taipei Wego Private Senior High School?

A1. We add “薇閣” in the front of our search query to grasp related data.

Q2. How to rearrange the results and display them according to the weight of keywords in the remaining relevant data?

A2. We use the technique of loop to rearrange the results.

Q3. How should the layout be configured?

A3.
